

MADMIXEDMEDIA / PRESS START

Full App Store & Business Compliance Audit

Senior Compliance Auditor Review • Prepared May 9, 2026

AUDIT METADATA

ENTITIES AUDITED	MAD MIXED MEDIA LLC (for-profit) + Press Start Gaming Inc. (501(c)(3))
DOMAINS AUDITED	pscomixx.com, pscomixx.online, madmixedmedia.com, pressstart.tech, psstreaming.com
APPS AUDITED	Press Start CoMiXX • Press Start FX Studio (Apple App Store, Google Play)
AUDIT DATE	May 9, 2026
PREVIOUS AUDIT	April 2026 (Version 1.0)
AUDIT TYPE	Full delta review with new policy framework (COPPA 2026, Xcode 26, DMCA Cox v. Sony)
AUDITOR	Senior Compliance Auditor Review
VERDICT	✗ DO NOT LAUNCH — COMPLIANCE POSTURE WORSENER SINCE APRIL

EXECUTIVE SUMMARY / STAKEHOLDER FIRST READ

Delta Tracker — What Changed Since April 2026

This update revisits every issue raised in the April 2026 audit and tracks live remediation. It also flags three new critical risks that have emerged in the four weeks since the last review — a live LMS at pressstart.tech collecting student data with no FERPA documentation, a live streaming platform at psstreaming.com operating without DMCA safe harbor, and the FTC's amended COPPA Rule moving into mandatory compliance on April 22, 2026.

ISSUE	APRIL 2026	MAY 2026
Privacy Policy — all domains	✗ ABSENT	✗ STILL ABSENT
Terms of Service — all domains	✗ ABSENT	✗ STILL ABSENT
In-app account deletion	✗ NOT CONFIRMED	✗ STILL NOT CONFIRMED
Business-domain email (not Gmail)	✗ FAIL	✗ FAIL — NO email at all
Physical address on madmixedmedia.com	✗ ABSENT	✗ STILL ABSENT
Press Start DUNS	✗ NOT OBTAINED	✗ STILL NOT OBTAINED
IAP / Founders Pass compliance	✗ UNRESOLVED	✗ STILL UNRESOLVED
UGC moderation — CoMiXX	✗ ABSENT	✗ STILL NO EVIDENCE
AI transparency consent modal	✗ ABSENT	✗ STILL ABSENT
Age rating questionnaire (Apple)	⚠ PAST DEADLINE	✗ STILL NOT SUBMITTED
FX Studio web wrapper risk	✗ HIGH RISK	✗ STILL UNRESOLVED
pressstart.tech — LMS	⚠ Login visible	NEW LIVE LMS — no PP, no FERPA docs
psstreaming.com	Was "Coming Soon"	NEW LIVE — UGC, music, NO DMCA
COPPA Rule Amendments (FTC)	Rule announced	NEW MANDATORY since Apr 22, 2026
Apple Xcode 26 / iOS 26 SDK	Not applicable	NEW REQUIRED since Apr 28, 2026
Google Developer Verification	⚠ Coming	NEW ACTIVE — deadline Sep 30, 2026

BOTTOM LINE ON DELTA

Zero issues from the April 2026 audit have been resolved. Three new critical risks have emerged: (1) a live LMS at pressstart.tech with no FERPA compliance, (2) a live streaming platform at psstreaming.com with no DMCA registration, and (3) the FTC's amended COPPA Rule now in mandatory effect since April 22, 2026.

LEGAL ENTITY / DEVELOPER ENROLLMENT / GRANT ELIGIBILITY

Section 1 — DUNS & Business Verification Audit

1.1 MAD MIXED MEDIA LLC (MADMIXEDMEDIA)

✓ PASS	DUNS number assigned to MAD MIXED MEDIA LLC (carried over from April audit).
✓ PASS	Legal entity name stated on madmixedmedia.com — "MADMIXEDMEDIA (MAD MIXED MEDIA LLC)".
⚠ RISK	D&B record must read MAD MIXED MEDIA LLC — not MADMIXEDMEDIA (one word). Apple's enrollment system performs character-for-character matching against the D&B profile; any spacing or punctuation mismatch will block enrollment.
✗ FAIL	No physical address publicly listed on madmixedmedia.com. Apple verification calls require a reachable business address; without one the enrollment call fails.
✗ FAIL	No contact email on madmixedmedia.com — not even the previously listed Gmail. There is now no contact method at all on the corporate site, which is a regression from the April audit.
⚠ RISK	Key Principal mismatch risk. A widely circulated developer-forum post from April 2026 documented an Apple enrollment blocked for 2.5 months because the DUNS Key Principal did not match the person submitting the developer application. Confirm before enrolling.
✓ NEW	Apple Business (successor to Apple Business Manager, launched April 14, 2026) now accepts EIN as an alternative verification method for US organizations. This provides a fallback if the D&B record has spelling/spacing issues — though Apple Developer Program enrollment for app submission still uses the DUNS-based flow.
⚠ RISK	Google Play Developer Verification — same Key Principal name-match risk applies. Verify before initiating Play Console enrollment.

1.2 Press Start Gaming Inc. (501(c)(3) nonprofit)

✗ FAIL	No DUNS number obtained for Press Start Gaming Inc. — unchanged from April.
✗ CRIT	pressstart.tech is now a LIVE LMS with active Student/Teacher/Admin signup and login. It is collecting student and educator data with no privacy policy and no FERPA documentation visible to users or districts.
✗ FAIL	Grant ineligibility — SAM.gov registration requires DUNS. Major foundations (Gates, Ford, Rockefeller, Google.org) require DUNS on applications. Press Start cannot receive a significant grant in its current state.
✗ FAIL	School district contracts — districts require a signed Data Processing Agreement (DPA) before deploying any EdTech platform. pressstart.tech has no DPA, no privacy policy, and no FERPA documentation. Any district currently piloting the LMS is exposed to FERPA liability alongside Press Start.
✗ FAIL	Cross-platform SSO data flow: the "Sign in with CoMiXX" button on pressstart.tech routes student data (likely names, ages, school, grade) between pressstart.tech and pscomixx.com — neither domain has a privacy policy. This is a compounding FERPA + COPPA violation.

1.3 Verification Checklist Summary

CHECKPOINT	STATUS	SEVERITY
MADMIXEDMEDIA physical address publicly listed	✗ FAIL	Enrollment blocker
MADMIXEDMEDIA contact email on corporate domain	✗ FAIL	Enrollment blocker
DUNS legal name matches D&B; character-for-character	⚠ Verify	Critical pre-check
Apple Key Principal name matches enrollment applicant	⚠ Verify	Critical pre-check
Google Play Key Principal name matches applicant	⚠ Verify	Critical pre-check
Press Start Gaming Inc. DUNS obtained	✗ FAIL	Blocks all grants
Press Start LMS — signed school DPA in place	✗ FAIL	FERPA exposure
Press Start LMS — published FERPA documentation	✗ FAIL	FERPA exposure
Cross-platform SSO data flow documented	✗ FAIL	COPPA + FERPA

✗ HIGH RISK

Why this is more urgent in May 2026 than April

The amended FTC COPPA Rule entered mandatory compliance on April 22, 2026. The Press Start Gaming Inc. nonprofit is the legal data controller for K-12-facing services in the ecosystem, but it has no DUNS, no privacy policy on its own LMS, and no DPA framework with school districts. Every day pressstart.tech is live without these documents compounds both Press Start's and any partnering district's FERPA / COPPA exposure.

APPLE APP STORE / GOOGLE PLAY / DOMAIN-LEVEL FINDINGS

Section 2 — App Store Compliance Audit

2.1 Domain-Level Findings — All Five Domains (Live Fetch May 9, 2026)

DOMAIN	PRIVACY POLICY	TERMS OF SERVICE	APP-STORE LINKS	CONTACT	CHANGE
pscomixx.com	ABSENT	ABSENT	ABSENT	ABSENT	No change
pscomixx.online	ABSENT	ABSENT	ABSENT	ABSENT	No change
madmixedmedia.com	ABSENT	ABSENT	ABSENT	ABSENT (no email)	Worse — email removed
pressstart.tech	ABSENT	ABSENT	—	ABSENT	CRITICAL — now live LMS
psstreaming.com	ABSENT	ABSENT	—	ABSENT	NEW — live streaming

2.2 Apple App Store — High Risk Flags

✗ HIGH RISK

#1 — Guideline 5.1 / COPPA: No Privacy Policy on ANY Domain (STILL)

Unchanged from April and now compounded by the amended COPPA Rule in effect since April 22, 2026. pscomixx.com publicly claims "COPPA/FERPA compliant" with no policy published anywhere. This is now simultaneously: (a) an Apple rejection trigger under Guideline 5.1, (b) an active FTC enforcement target, and (c) a misrepresentation to users, schools, and districts. FTC Commissioner Mark Meador has stated enforcement is a priority and the Commission is "willing and eager" to enforce. Precedent: Cognosphere paid \$20M in January 2025 for collecting children's data without consent.

✗ HIGH RISK

#2 — Guideline 5.1.1(v): Account Deletion Not Confirmed (STILL)

Both CoMiXX and FX Studio — to the extent they create accounts — must offer in-app account deletion. The new "Sign in with CoMiXX" SSO flow on pressstart.tech confirms CoMiXX has live accounts. There is still no evidence of an in-app deletion path. This is an automatic rejection criterion enforced by Apple since June 2022 and Google Play since May 2024.

✗ HIGH RISK**#3 — Guideline 1.2: UGC Moderation — CoMiXX + psstreaming.com (ESCALATED)**

In April this risk applied only to CoMiXX. With psstreaming.com now live — accepting comic publishing, music submissions (Beat Battles), HOPs, visual novels, community voting, and user profiles — there are now two UGC layers with no visible content moderation, no user-reporting flow, no EULA at sign-up, and no age verification. The streaming platform is the distribution endpoint for CoMiXX output, so neither layer can be cleared in isolation.

✗ HIGH RISK**#4 — AI Transparency under Guideline 5.1.2(i) (STILL)**

Both apps advertise AI art generation. There is no consent modal before AI processes user data and no disclosure of which AI providers are used. Under the amended COPPA Rule, sharing children's data with third parties for AI training requires separate verifiable parental consent — and third-party AI vendors must provide written assurances they will protect children's data. None of this infrastructure exists.

✗ HIGH RISK**#5 — Guideline 3.1.1 IAP / Founders Pass (STILL)**

The Founders Pass — "Unlock AI generation, high-res exports, 4K rendering & the full production pipeline" — is still described on pscomixx.online with no confirmation it routes through Apple In-App Purchase. Any digital subscription sold inside an iOS app must use Apple IAP or the app is rejected on submission.

✗ HIGH RISK**#6 — Age Rating Questionnaire (ESCALATED)**

The January 31, 2026 deadline has passed. Apple has automatically updated existing age ratings since April 28, 2026 to align with the new iOS 26 age-rating system. Going forward, the questionnaire must be submitted before any new app submission or the submission is blocked — this is now in the mandatory compliance window, not an advisory item.

✗ HIGH RISK**#7 — Xcode 26 / iOS 26 SDK Requirement (NEW since April 28, 2026)**

Since April 28, 2026, every new app submission to App Store Connect must be built with Xcode 26 or later using the iOS 26 SDK. If the CoMiXX or FX Studio mobile builds are not updated to Xcode 26, they cannot be submitted at all. This is not a reviewer-judgment call — it is an automated submission gate.

⚠ MEDIUM RISK**Guideline 4.2 — FX Studio Web Wrapper (STILL UNRESOLVED)**

FX Studio continues to be described on pscomixx.online as "browser-based creative tools" with no evidence of a native mobile build. If the mobile shipped artifact is a UIWebView/WKWebView of pscomixx.online, this is the highest-probability single rejection reason — Guideline 4.2 rejects "minimum functionality" wrappers with no appeal path.

⚠️ MEDIUM RISK**Guideline 2.1 — App Completeness**

PS Streaming is no longer described as "coming soon" — it is live. If CoMiXX advertises a streaming integration that is live but the integration inside the app is incomplete or returns errors, reviewers will test it and reject under 2.1.

2.3 Google Play Store — High Risk Flags**✖ HIGH RISK****Data Safety Form — cannot be completed without a Privacy Policy**

Google Play's Data Safety form requires a published privacy policy URL. With no privacy policy on any of the five domains, the form cannot be completed. The submission is blocked at the Play Console step.

✖ HIGH RISK**Account Deletion — enforced by Google Play since May 2024**

Same requirement as Apple. Apps with sign-up flows must offer in-app deletion and a publicly accessible web deletion path. Neither is in place for CoMiXX or FX Studio.

✖ HIGH RISK**Android Developer Verification — must be completed NOW**

Timeline: March 2026 verification opened to all developers; April 2026 Android Developer Verifier system service went live in Google Systems; June 2026 early access for limited distribution accounts; August 2026 full global launch of limited distribution accounts and the advanced sideloading flow; September 30, 2026 hard deadline — apps must be registered by verified developers to install or update on certified Android devices in Brazil, Indonesia, Singapore, and Thailand; 2027 global enforcement. MADMIXEDMEDIA must complete Play Console verification immediately to avoid being blocked at the September enforcement date.

✖ HIGH RISK**April 15, 2026 Play Policy Update**

New policies took effect on April 15, 2026 with a 30-day grace period (now expired). Play Console must be reviewed for category-specific updates affecting comics, education, AI-generated content, and UGC streaming categories — all of which apply to the CoMiXX / PS Streaming pair.

✖ HIGH RISK**No Visible Developer Contact Email**

Even the Gmail previously listed has been removed from madmixedmedia.com. Both Apple and Google require a valid, reachable developer contact. With no email of any kind on the corporate site, both stores will fail enrollment verification.

2.4 Critical Policy Backdrop — What Changed Between April and May 2026

POLICY SHIFT	EFFECTIVE	IMPACT ON THIS BUSINESS
FTC amended COPPA Rule — mixed-audience classification, new biometric scope, separate AI/ad-sharing consent, written information security program, third-party vendor assurances	Apr 22, 2026	pscomixx.com explicitly claims COPPA compliance with zero infrastructure. Single largest legal exposure in this audit.
Apple Xcode 26 / iOS 26 SDK — required for all new submissions; ages auto-updated	Apr 28, 2026	Hard technical gate — no Xcode 26 build = no submission accepted, period.
Apple Business launch — EIN now accepted as alternative verification	Apr 14, 2026	Slight tailwind for MADMIXEDMEDIA — fallback if D&B; name mismatch issues surface.
Google Play Developer Verification — verified-developer requirement for installable apps	Sep 30, 2026 (BR/ID/SG/TH); 2027 global	Must complete Play Console verification immediately or apps stop installing/updating in initial markets.
April 15, 2026 Google Play policy update — category-specific changes	Apr 15, 2026	30-day grace period now expired; review required for comics / education / AI / UGC categories.
Cox v. Sony (US Supreme Court) — DMCA safe harbor reaffirmed only for platforms with registered agent + published policies	Mar 2026	psstreaming.com has no registered DMCA agent. No safe harbor protection — direct copyright liability for every infringing user submission.

REVIEWER TEST SEQUENCES / EXPECTED REJECTION REASONS

Section 3 — Product Readiness Audit

3.1 CoMiXX — Apple Reviewer Test Sequence

01. Is the app built with Xcode 26 / iOS 26 SDK? If not — the submission is rejected at upload, no review.
02. Launch stability — a crash on first open is an immediate rejection.
03. Core creation flow — comic panel → speech bubble → export. The 300 DPI export claim will be tested.
04. AI generation — does it work? Is there a consent modal before any AI processes user data?
05. Streaming integration — can the reviewer publish to psstreaming.com from inside the app? Is there moderation?
06. Account creation — does sign-up work? Is there an in-app account deletion path?
07. Privacy policy — accessible from a Settings/About screen inside the app?
08. Founders Pass — does the upgrade flow hit Apple's payment sheet (IAP)?
09. Age gate — given K-12 targeting and the amended COPPA Rule, is there age verification at signup?
10. Marketplace — if visible inside the app, are all transactions routed through Apple IAP?

CoMiXX — Likely Rejection Reasons

- ✗ FAIL — Cannot submit if not built with Xcode 26 (since April 28, 2026)
- ✗ FAIL — No in-app privacy policy link
- ✗ FAIL — No account deletion path
- ✗ FAIL — UGC publishing with no moderation system
- ✗ FAIL — AI features without consent modal
- ✗ FAIL — Founders Pass / marketplace without IAP
- ✗ FAIL — K-12 targeting without COPPA age gate at signup
- ⚠ WARN — Complex multi-platform ecosystem; any single broken integration triggers rejection.

3.2 FX Studio — Apple Reviewer Test Sequence

01. Is the app native or a WebView wrapper of pscomixx.online? A WebView wrapper is rejected under Guideline 4.2 with no appeal.
02. Do the 15+ tools work without full server dependency? Reviewers test offline behavior.
03. 4K rendering / high-res export — does it complete? A timeout during review is treated as failure.
04. Founders Pass payment flow — Apple IAP or external payment provider?
05. Privacy policy accessible inside the app?
06. Account deletion flow inside the app?
07. Export pipeline (MP4 / GIF) — functional end-to-end?

FX Studio — Likely Rejection Reasons

- ✗ FAIL — Cannot submit if not built with Xcode 26 (since April 28, 2026)
- ✗ FAIL — Web wrapper under Guideline 4.2 — highest-probability rejection
- ✗ FAIL — Founders Pass not routed through Apple IAP
- ✗ FAIL — No in-app privacy policy
- ✗ FAIL — No account deletion path
- ⚠ WARN — Backend timeout during AI / 4K export under review = failure.

3.3 psstreaming.com — New Platform Compliance Assessment

psstreaming.com is live and presents the most acute compliance gaps of any asset in the ecosystem. While the platform itself has not yet been submitted to an app store, it is a live web product potentially serving K-12 users — and it generates direct legal liability for MAD MIXED MEDIA LLC every day it operates without remediation.

✗ HIGH RISK**DMCA — Zero safe-harbor protection**

No registered DMCA agent with the US Copyright Office. No published takedown policy. No repeat-infringer policy. Beat Battles ("Producer vs producer. The community votes.") accepts user-submitted music — any track containing sampled copyrighted material creates immediate copyright liability for the operator (MAD MIXED MEDIA LLC) without the safe-harbor defense reaffirmed by Cox v. Sony (March 2026).

✗ HIGH RISK**UGC moderation — None visible across multiple content types**

Streaming comics, visual novels, motion comics, HOPs (interactive slideshows), trading cards, and music — all UGC, none with moderation, reporting, or EULA. Visible accounts (@mojocreative — 0 subscribers, confirms an operator account; @damjo, @pixelforge, @zara-ink, @nova-studios) and trending engagement metrics (13.2K views, 12.8K) confirm this is a live product, not a placeholder.

✗ HIGH RISK**Age verification — None on a UGC platform with music**

K-12 students are explicitly targeted by the broader ecosystem. The streaming platform has no age gate at registration. Under the amended COPPA Rule's mixed-audience classification, age must be determined before personal information is collected.

✗ HIGH RISK**Privacy Policy — None on a platform that is clearly collecting data**

View counts, subscriber counts, and creator accounts confirm data collection. No privacy policy is published. This combination alone exposes the operator to FTC enforcement under Section 5 (deceptive practices) regardless of any COPPA element.

3.4 Mobile UX vs. Industry Benchmarks

	NATIVE	OFFLINE	EXPORT	IAP	MODERATION	DMCA	PRIVACY
Canva	✓	Basic	✓	✓	N/A	N/A	✓
Webtoon	✓	Cache	✓	✓	✓ Full	✓	✓
CoMiXX (current)	Unknown	Unknown	Web-only	✗ External risk	✗	N/A	✗
FX Studio (current)	✗ Likely wrapper	✗	Web-dep	✗ External risk	N/A	N/A	✗
psstreaming.com	Web platform	N/A	N/A	N/A	✗	✗ ABSENT	✗

MONTH-OVER-MONTH SCORECARD

Section 4 — Launch Readiness Score

4.1 Scorecard — April vs. May 2026

CATEGORY	APRIL SCORE	MAY SCORE	CHANGE	RATIONALE
Business Legitimacy	4 / 10	4 / 10	↔ no change	Corporate copy improved on madmixedmedia.com but no legal docs added; address absent; email removed entirely.
App Stability	Unknown*	Unknown*	↔ unverifiable	Mobile artifacts not provided to auditor; cannot evaluate without builds.
Compliance Readiness	2 / 10	1 / 10	↓ WORSENER	New live LMS and live streaming platform with zero compliance; COPPA Rule now in mandatory effect.
Market Positioning	7 / 10	7 / 10	↔ no change	Strong concept; ecosystem documentation improved; compliance debt is growing faster than the platform footprint.

X HIGH RISK

OVERALL VERDICT — DO NOT LAUNCH YET — COMPLIANCE POSTURE HAS WORSENER SINCE APRIL

The April 2026 audit identified six independent rejection triggers. This May 2026 update finds the same six — none resolved — plus three new critical risks: (1) a live LMS at pressstart.tech with no FERPA compliance, (2) a live streaming platform at psstreaming.com with no DMCA registration, and (3) the FTC's amended COPPA Rule now in mandatory effect since April 22, 2026.

The most urgent new exposure is not app store submission. It is the combination of: (a) a live LMS collecting K-12 student data through "Sign in with CoMiXX" SSO with no privacy policy, no FERPA documentation, and no school DPA; and (b) psstreaming.com accepting user-submitted music without DMCA safe harbor protection — which creates direct copyright liability for MAD MIXED MEDIA LLC right now, today, regardless of any app store submission.

WHAT TO FIX, IN WHAT ORDER, BY WHEN

Section 5 — Top 10 Critical Fixes (Updated Priority Order)

5.1 RANK 1 — Will Cause Rejection or Creates Live Legal Liability NOW

01

Register DMCA Agent + Publish DMCA Policy on psstreaming.com

CRITICAL • THIS WEEK

Blocking + immediate legal liability. psstreaming.com is accepting user-submitted music (Beat Battles) right now with no safe-harbor protection. MAD MIXED MEDIA LLC is directly liable for copyright infringement on every infringing track submitted. Fix: register a DMCA agent with the US Copyright Office (~\$6/year), publish a takedown policy, publish a repeat-infringer policy. This takes 1–2 days and eliminates direct copyright liability. Cox v. Sony (March 2026) reaffirmed that safe harbor only protects platforms with a registered agent and published policies — without them, there is zero protection.

02

Publish COPPA-Compliant Privacy Policies on All Five Domains

CRITICAL • THIS WEEK

Blocking + FTC liability. The amended COPPA Rule has been in mandatory effect since April 22, 2026 and the FTC has publicly stated enforcement is a priority. pscomixx.com claims "COPPA/FERPA compliant" with no policy — an active enforcement target. pressstart.tech is a live LMS collecting student data with no policy — the single most legally exposed asset in the ecosystem. Precedent: Cognosphere paid \$20M in January 2025. The policy must satisfy the 2026 amended Rule including: separate verifiable consent for AI/ad data sharing, data retention limits, written information security program with annual risk assessments, and written third-party vendor assurances.

03

Execute School Data Processing Agreements (DPAs) for pressstart.tech

CRITICAL • BEFORE NEXT DEPLOYMENT

FERPA-critical. Any school district deploying pressstart.tech today is doing so without a DPA — this exposes both Press Start Gaming Inc. and the district to FERPA liability. The "Sign in with CoMiXX" cross-platform SSO creates a completely undocumented student-data flow. No district compliance officer will approve renewal without a signed DPA. Use the standard student DPA templates from the Student Data Privacy Consortium (SDPC) — free to adapt.

04

Implement In-App Account Deletion (CoMiXX + FX Studio)

CRITICAL • BEFORE SUBMISSION

Blocking. Required by Apple since June 2022 and by Google Play since May 2024. "Sign in with CoMiXX" SSO confirms accounts exist. Deletion must work inside both apps and must explain the effect on Founders Pass subscriptions on deletion.

05

Build with Xcode 26 / iOS 26 SDK

CRITICAL • HARD GATE

Hard technical gate. Since April 28, 2026 no new App Store submission is accepted unless built with Xcode 26. If the CoMiXX and FX Studio mobile builds are not updated to Xcode 26, they cannot be submitted — period. Update now and test on iOS 26 simulators before the first submission attempt.

5.2 RANK 2 — Will Hurt User Retention or Create Ongoing Business Risk

06	Route Founders Pass / Marketplace through Apple IAP + Google Play Billing	BLOCKING • BEFORE SUBMISSION
Founders Pass is still described on pscomixx.online with no confirmation of platform billing. Paid features inside iOS or Android apps cannot be sold through any payment method other than Apple IAP / Google Play Billing. Audit the upgrade flow inside each app: if the "Upgrade" button does not invoke Apple's payment sheet, rebuild it before any submission attempt.		
07	Native Mobile Rebuild — Eliminate FX Studio Web-Wrapper Risk	BLOCKING • 4–8 WEEKS
FX Studio continues to be described as "browser-based" tools — the highest-probability single rejection reason. If pscomixx.online is rendered inside a UIWebView/WKWebView as the primary interface, Apple rejects under Guideline 4.2. Native rebuild required: Swift / SwiftUI shell with a JavaScript-Canvas bridge, the pattern used by Canva and Adobe Express.		
08	Implement Full UGC Moderation — CoMiXX + psstreaming.com	HIGH • BEFORE SUBMISSION
Required components: content reporting on every published item, user blocking, EULA accepted at sign-up on both platforms, clear Beat Battles rules about acceptable audio content with copyrighted-material filtering, and a manual moderation queue for launch.		
09	Add Age Verification — CoMiXX Signup + psstreaming.com Access	HIGH • COPPA CRITICAL
The amended COPPA Rule requires that mixed-audience services determine whether a user is a child before collecting personal information. CoMiXX explicitly targets K-12 — by definition a mixed-audience service at minimum. Required: age gate at signup, verifiable parental consent flow for under-13 users, restricted feature set for minors (no AI data processing without parental consent, no marketplace). psstreaming.com needs an age gate or must block under-13 registration entirely.		
10	Add Physical Address + Business-Domain Email to madmixedmedia.com	HIGH • ENROLLMENT BLOCKER
Apple requires both to be visible during the enrollment verification call. The Gmail was removed — there is now no contact method at all on the corporate site. Add: a registered business address (Long Beach, CA), an @madmixedmedia.com email, and a phone number. This is a one-hour fix that unblocks Apple Developer enrollment.		

LLC + 501(C)(3) DUAL ENTITY / INTERCOMPANY GOVERNANCE

Section 6 — Strategic Structure Validation

6.1 Current Structure Assessment

MAD MIXED MEDIA LLC (for-profit) — developer accounts, monetization, IP exploitation. ☒ Still appropriate.

Press Start Gaming Inc. (501(c)(3) nonprofit) — curriculum IP, education programs, grants. ☒ Still appropriate.

The structure itself is sound. The execution gaps are larger than in April.

- ☒ **PASS** — LLC + 501(c)(3) dual structure is the right model — Khan Academy / Khan Academy Labs precedent.
- ☒ **PASS** — Nonprofit holds curriculum IP — correct posture for grant eligibility and tax-exempt program work.
- ☒ **PASS** — Five-platform ecosystem now clearly documented on madmixedmedia.com — good corporate transparency.

6.2 Open Risks

✗ HIGH RISK

NEW RISK — Intercompany Agreement Still Absent

madmixedmedia.com now explicitly states: "Press Start Gaming Inc. — an independent 501(c)(3) nonprofit — holds curriculum IP as a licensed partner." This implies an IP licensing arrangement — but if no signed, documented Intercompany Agreement at fair market value exists, the IRS can claim the LLC is receiving private benefit from the nonprofit, threatening Press Start's 501(c)(3) status. The phrase "licensed partner" on a public website without an underlying legal agreement is a compliance risk, not a compliance solution. Required: Formal IP License Agreement, Service Agreement, and Revenue Sharing Agreement, all at documented fair market rates and approved by independent Press Start board directors.

✗ HIGH RISK

Private Benefit / Inurement Risk (STILL)

If the same person(s) control both entities and MADMIXEDMEDIA receives below-market services or IP from Press Start, the IRS will classify this as inurement. Mitigation: independent directors on the Press Start board; related-party transactions voted on and documented in board minutes.

✗ HIGH RISK

UBIT on Platform Revenue (ESCALATED)

psstreaming.com is now live. If any revenue from streaming subscriptions, Beat Battles entry fees, or ad revenue flows through Press Start Gaming Inc. rather than MAD MIXED MEDIA LLC, it is likely Unrelated Business Income Tax (UBIT) and is taxable. All commercial platform revenue must flow through MADMIXEDMEDIA LLC only and be documented in the Intercompany Agreement.

✕ HIGH RISK**COPPA Data Controller Ambiguity (NOW URGENT)**

pressstart.tech LMS collects student data under "Sign in with CoMiXX." Which entity is the data controller? pscomixx.com collects creator data — which entity owns it? The amended COPPA Rule requires explicit, documented data-controller assignments. Recommended assignment: MAD MIXED MEDIA LLC = data controller for all platform/app data; Press Start Gaming Inc. = data processor for LMS/school data, with a formal DPA between the two entities.

6.3 Is There a Better Structure?

No — the structure is right. The execution is the problem. Required additions: (1) a Formal Intercompany Agreement (IP License + Services + Revenue Sharing); (2) a Data Processing Agreement between the two entities; (3) independent directors on the Press Start board; and (4) documented fair-market value for any services flowing between entities.

ALL FIXES — RANKED BY URGENCY, TIMELINE, AND LIABILITY EXPOSURE

Section 7 — Fix Priority Matrix

#	FIX	URGENCY	TIMELINE	BLOCKS STORE?	LIVE LIABILITY?
1	Register DMCA agent + publish policy (psstreaming.com)	CRITICAL	This week	No	✓ YES — today
2	COPPA-compliant privacy policies on all 5 domains	CRITICAL	This week	✓ YES	✓ YES — today
3	School DPAs for pressstart.tech	CRITICAL	Before next deployment	No	✓ YES
4	In-app account deletion (CoMiXX + FX Studio)	CRITICAL	Before submission	✓ YES	No
5	Xcode 26 / iOS 26 SDK build update	CRITICAL	Before submission	✓ YES — hard gate	No
6	Founders Pass / Marketplace via IAP + Play Billing	HIGH	Before submission	✓ YES	No
7	Native mobile rebuild — FX Studio	HIGH	4–8 weeks	✓ YES	No
8	UGC moderation — CoMiXX + psstreaming.com	HIGH	Before submission	✓ YES	Growing
9	Age verification — CoMiXX + psstreaming.com	HIGH	Before submission	✓ YES	✓ YES — COPPA
10	Physical address + email on madmixedmedia.com	HIGH	This week	Enrollment blocker	No
11	DUNS + SAM.gov registration — Press Start Gaming Inc.	MEDIUM	30 days	No	Blocks grants
12	Intercompany Agreement (LLC ↔ Nonprofit)	MEDIUM	30–60 days	No	✓ IRS risk
13	Press Start board — independent directors	MEDIUM	60–90 days	No	✓ IRS risk
14	AI consent modal (providers, data use)	HIGH	Before submission	✓ YES	Growing
15	Google Play developer verification completion	HIGH	Before Sep 2026	✓ Will be YES	No

Closing Note

The May 2026 audit finds the same compliance gaps as April with zero remediation — and three new critical live liabilities. The platforms are growing: psstreaming.com is live, the pressstart.tech LMS is live, the ecosystem is expanding. Compliance infrastructure must match platform growth. The most urgent action is not app store submission preparation — it is DMCA registration for psstreaming.com and a COPPA-compliant privacy policy on all five domains. Both create direct legal liability for MAD MIXED MEDIA LLC today, not at some future submission date. Resolve those two items this week, regardless of all other priorities.
