

MADMIXEDMEDIA / Press Start

Full App Store & Business Compliance Audit

Prepared: April 2026

Audited Entities	MAD MIXED MEDIA LLC (for-profit, Long Beach CA, 2021) Press Start Gaming Inc. (501(c)(3) nonprofit)
Audited Domains	pscomixx.com • pscomixx.online • madmixedmedia.com • pressstart.tech
Audited Products	Press Start CoMiXX • Press Start FX Studio
Scope	Apple App Store / Google Play / DUNS / COPPA / FERPA / IAP / UGC / AI Transparency / Entity Structure
Verdict	DO NOT LAUNCH YET — at least 6 issues will cause automatic rejection on first submission.

Executive Summary

This audit evaluates the launch-readiness of the MADMIXEDMEDIA / Press Start ecosystem across four owned domains and two mobile products (Press Start CoMiXX and Press Start FX Studio) against current Apple App Store, Google Play, COPPA, FERPA, and nonprofit-governance requirements as of April 2026. The findings below are direct and unfiltered. This is a stop-sign report: the ecosystem is not submission-ready, and launching in its current state will waste developer fees, risk account-level flags from both platforms, and expose the companies to FTC scrutiny.

Top-Line Verdict

Category	Score	One-Line Summary
Business Legitimacy	4 / 10	LLC exists, DUNS assigned, but gmail contact, no legal docs on any domain, Press Start DUNS missing.
App Stability	Unknown*	Not verifiable — no TestFlight / Play beta access. Web apps appear functional; native mobile builds untested.
Compliance Readiness	2 / 10	Zero privacy policies, zero ToS, no account deletion, no UGC moderation, no IAP compliance confirmed.
Market Positioning	7 / 10	Strong concept, clear niche, good ecosystem narrative, competitive with Canva / Webtoon in creator-edu.

*App Stability is unverifiable from external audit. Score is conditional on native mobile builds existing.

What Would Happen If You Submitted Today

- ✗ **FAIL** Apple App Store: Immediate rejection under Guideline 5.1 (no privacy policy), 5.1.1(v) (no account deletion), 1.2 (UGC without moderation), and 5.1.2(i) (AI without consent disclosure).
- ✗ **FAIL** Google Play: Cannot complete Data Safety Form without a privacy policy; submission is blocked at Play Console.
- ✗ **FAIL** Developer Enrollment: Apple verification call would likely fail — legal entity name mismatch risk, gmail contact, and no company identity visible on madmixedmedia.com.
- ⚠ **WARN** FTC Exposure: Public COPPA/FERPA claims on pscomixx.com and pressstart.tech with no published privacy policy is a live legal liability — fines up to \$51,744 per COPPA violation, per child.
- ⚠ **WARN** Grant Eligibility: Press Start Gaming Inc. cannot receive federal grants or SAM.gov registration without its own DUNS number.

Critical Path to Submission-Readiness

Five fixes must complete before any App Store submission: (1) publish COPPA-compliant privacy policies on all four domains and surface them inside both apps; (2) implement in-app account deletion (mandatory at Apple since 2022, Google since May 2024); (3) route every paid feature — including Founders Pass and marketplace transactions — through Apple IAP and Google Play Billing; (4) if FX Studio is a WebView wrapping pscomixx.online, rebuild as native — Apple Guideline 4.2 has no appeal path for web wrappers; (5) ship an AI-transparency consent modal per Guideline 5.1.2(i), with parental consent for K-12 users.

Section 1 — DUNS & Business Verification Audit

Apple requires a DUNS number for organization enrollment, registered to the legal entity — not a DBA, trade name, or branch office. The legal entity name must match the D&B profile exactly, including spelling, capitalization, and punctuation. Apple cross-references D&B, and any mismatch causes rejection or a hold. Google Play requires DUNS for new organization accounts as of August 2023, with developer verification opening to all developers in March 2026 and becoming mandatory in September 2026.

MAD MIXED MEDIA LLC

- ✓ **PASS** DUNS number is assigned.
- ✗ **FAIL** RISK: Verify legal entity name in D&B matches exactly "MAD MIXED MEDIA LLC" — not "MADMIXEDMEDIA" (one word, no spaces). This mismatch will cause Apple enrollment failure.
- ✗ **FAIL** RISK: Business email on madmixedmedia.com is mojocreative1@gmail.com. Apple requires a domain-based work email during enrollment. A personal Gmail address signals to Apple reviewers that this is not a legitimate business operation. Must use an @madmixedmedia.com email.
- ⚠ **WARN** Address: Confirm D&B profile has the Long Beach, CA physical address — P.O. boxes are not accepted by Apple.
- ⚠ **WARN** Website: Apple verifies madmixedmedia.com is publicly accessible and associated with the legal entity. The site currently has no Privacy Policy and no Terms of Service, which creates risk during the Apple verification call.

Press Start Gaming Inc. (501(c)(3))

- ✗ **FAIL** No DUNS number confirmed for Press Start Gaming Inc.
- ✗ **FAIL** A separate DUNS is mandatory if Press Start will apply for federal or state grants, foundation grants, Google.org funding, school-district contracts, or nonprofit credibility verification.
- ✗ **FAIL** DUNS is required for SAM.gov registration — without SAM.gov, Press Start cannot receive any federal grant award.
- ⚠ **WARN** If Press Start wants its own Apple Developer account for educational distribution via Apple School Manager, it will need its own DUNS.
- ⚠ **WARN** If Press Start appears on grant applications without DUNS, it cannot receive awards from most major funders.

Section 1 Checklist

- ✗ **FAIL** MADMIXEDMEDIA legal name exact-match verification pending.
- ✗ **FAIL** Business domain email not present — Gmail used instead.
- ✗ **FAIL** Press Start DUNS not obtained.
- ✗ **FAIL** No website publicly shows the legal entity name plus physical address (required for Apple verification call).

Required Fixes — Section 1

1.	Log into D&B and verify the exact legal entity name matches the California LLC registration on file with the Secretary of State.
2.	Create and use an @madmixedmedia.com email for all developer accounts and App Store / Play Console listings.

3.	Apply for Press Start Gaming Inc. DUNS immediately (free; takes up to 30 days). Then register SAM.gov for grant eligibility.
4.	Add legal company name, physical address, and business contact info visibly on madmixedmedia.com before beginning Apple enrollment.

Section 2 — App Store Compliance Audit

Both products target the Apple App Store and Google Play. Both platforms have independently tightened enforcement on privacy disclosures, account deletion, AI transparency, and UGC moderation over the last 18 months. The audit below identifies the submission-blocking issues — each one is sufficient, on its own, to cause rejection.

Domain-Level Findings

Domain	Privacy Policy	Terms of Service	App Store Links	Contact Info
pscomixx.com	ABSENT	ABSENT	ABSENT	ABSENT
pscomixx.online	ABSENT	ABSENT	ABSENT	ABSENT
madmixedmedia.com	ABSENT	ABSENT	—	Gmail only
pressstart.tech	ABSENT	ABSENT	—	ABSENT

Apple App Store — High-Risk Flags

HIGH RISK — Guideline 5.1 Privacy / No Privacy Policy on Any Domain

pscomixx.com, pscomixx.online, madmixedmedia.com, and pressstart.tech all have zero privacy policies. Apple requires a privacy policy link in App Store Connect and accessible inside the app. COPPA/FERPA compliance is claimed on pscomixx.com with no published policy to back it up — this is a legal liability, not just a submission risk. A COPPA claim without a compliant privacy policy is potentially an FTC violation.

HIGH RISK — Guideline 5.1.1(v) Account Deletion Not Confirmed

Both CoMiXX and FX Studio create accounts (XP, profiles, published content). No evidence of in-app account deletion functionality. This has been an automatic-rejection criterion at Apple since June 2022 and at Google Play since May 2024.

HIGH RISK — Guideline 1.2 UGC Moderation (CoMiXX specifically)

CoMiXX ships community publishing, a marketplace, user profiles, and streaming to an audience. There is no evidence of content filtering, a reporting system, user blocking, or an EULA. Apple will test the publish flow and look for moderation controls. The K-12 / COPPA context makes this even more critical — Apple scrutinizes UGC apps targeting minors much harder.

HIGH RISK — AI Transparency (Guideline 5.1.2(i), effective Nov 13, 2025)

Both apps advertise AI art generation and AI tools. There is no consent modal, no disclosure of which AI providers are used, and no data-handling statement. Apps using AI with minors (K-12) face maximum scrutiny. A COPPA app passing personal data to a third-party AI without explicit consent is a compounding violation.

HIGH RISK — Guideline 3.1.1 IAP / External Payments

The "Founders Pass" is described on pscomixx.online. If it unlocks in-app features and is sold outside the App Store, that violates IAP rules. "Marketplace selling" is advertised inside CoMiXX — creator-to-creator transactions require careful IAP structuring. Any external payment link, Stripe flow, or PayPal button inside the app is an immediate rejection.

HIGH RISK — Age Rating Questionnaire (Jan 31, 2026 deadline — already past)

New ratings 13+, 16+, 18+ are in effect. K-12 students plus UGC plus AI plus marketplace rates 13+ at minimum. An age gate and account restrictions for under-13 users are required under COPPA. UGC apps must implement Guideline 1.2.1 age-restriction mechanisms.

MEDIUM RISK — Guideline 4.2 Minimum Functionality

FX Studio advertises "15+ browser-based creative tools". If the mobile app is wrapping a browser-based web app, Apple will reject it as a web wrapper under Guideline 4.2. Apple explicitly rejects apps that are shells around websites. The mobile build must be a native experience with native controls — not a WebView of pscomixx.online.

MEDIUM RISK — Guideline 2.1 App Completeness

"PS Streaming: Coming Soon" appears on madmixedmedia.com. If this is a core advertised feature and is non-functional at submission, Apple will reject the build. Any "coming soon" placeholder screen visible during review is grounds for rejection.

Google Play — High-Risk Flags

HIGH RISK — No Business Email / Gmail on Developer Account

The Google Play listing shows a contact email visible to users. mojocreative1@gmail.com is unprofessional and signals low trust. DUNS is required for org accounts; enrollment must use the verified business identity.

HIGH RISK — Data Safety Form Incomplete

Without a privacy policy, the Data Safety Form in Play Console cannot be completed. Submission is blocked at this stage — there is no publish path without it.

HIGH RISK — Account Deletion (enforced May 2024)

Same as Apple. In-app deletion plus a web-based deletion resource are both required. Non-compliance results in rejection and potential removal of any existing apps already in the store.

HIGH RISK — Developer Verification (open to all: March 2026, enforced Sep 2026)

Verification is happening now. It must be completed before the September 2026 enforcement date on all certified Android devices. Registration requires DUNS, package name, and signing keys. This is not optional and is not a future problem — it is a current deadline.

Section 3 — Product Readiness Audit

Apple reviewers treat the first submission as a hostile test: they open the app, push on every button, and reject at the first broken flow. The checks below enumerate what a reviewer will do with each product and which failures are already probable given the current public footprint.

CoMiXX — What Apple Reviewers Will Test

- 1. Launch & stability — does the app open without crash? Does onboarding work end-to-end?
- 2. Core creation flow — can a reviewer create a comic panel, add a speech bubble, and export it?
- 3. AI generation — does it work? If it requires backend connectivity and the server is down, it fails.
- 4. Publishing flow — can a reviewer publish content? Is moderation present?
- 5. Account creation — does sign-up work? Is there account deletion?
- 6. Privacy policy — is it accessible from inside the app (Settings / About)?
- 7. IAP — if Founders Pass or marketplace exists, are all purchases through Apple IAP?
- 8. COPPA — if the reviewer flags K-12 targeting, does the app have age verification at signup?

Likely Rejection Reasons — CoMiXX

- ✗ **FAIL** No in-app privacy policy link.
- ✗ **FAIL** No account deletion.
- ✗ **FAIL** UGC without moderation (publishing to community).
- ✗ **FAIL** AI used without a consent modal.
- ✗ **FAIL** Marketplace without IAP compliance.
- ✗ **FAIL** COPPA claims without an age gate at signup.
- ⚠ **WARN** Complex feature set reviewed by someone unfamiliar — any single broken flow triggers rejection.

FX Studio — What Apple Reviewers Will Test

- 1. Is this a native app or a web wrapper of pscomixx.online? If it is a WebView loading pscomixx.online, it will be rejected under Guideline 4.2.
- 2. Core tool functionality — do the 15+ tools actually work offline or without full server dependency?
- 3. Export flow — can a reviewer complete a creation and export it (MP4, GIF)?
- 4. Founders Pass — is it purchasable via IAP, or does it redirect to a website?
- 5. Stability — any crash is an immediate rejection.

Likely Rejection Reasons — FX Studio

- ✗ **FAIL** Web-wrapper rejection — highest-probability risk for this product type.
- ✗ **FAIL** Founders Pass not routed through Apple IAP.
- ✗ **FAIL** No privacy policy accessible in-app.
- ✗ **FAIL** No account deletion.
- ⚠ **WARN** 4K rendering or AI generation may hit backend timeouts — any timeout error during review is a failure.

Mobile UX Quality Standards — Benchmarks

Product	Native Controls	Offline Mode	Export Flow	IAP	Moderation
Canva	Native	Basic tools	Full	Clear IAP	N/A

Webtoon	Native	Reader cache	Full	Clear IAP	Full system
CoMiXX (current)	Unknown	Unknown	Web-only	External risk	Absent
FX Studio (current)	Likely wrapper	No	Web-dep	External risk	N/A

Both apps currently appear to be web-first products. Mobile adaptation must be native — not wrapped. The gap between current state and Canva/Webtoon benchmarks is the single largest product risk in this audit.

Section 4 — Launch Readiness Score

The scorecard below summarizes the four pillars of launch readiness. The bottom line: the ecosystem cannot pass its first App Store review. That is not a matter of polish — it is a compliance gap with at least six independent causes of automatic rejection.

Category	Score	Notes
Business Legitimacy	4 / 10	LLC exists, DUNS assigned, but Gmail contact, no legal documents on any domain, and Press Start DUNS is missing.
App Stability	Unknown*	Cannot verify — no TestFlight or Play beta access was provided. The web apps appear functional; mobile builds are untested.
Compliance Readiness	2 / 10	Zero privacy policies, zero Terms of Service, no account deletion, no UGC moderation, no IAP compliance confirmed.
Market Positioning	7 / 10	Strong concept, clear niche (creator-education crossover), good ecosystem narrative, competitive with Canva and Webtoon in the creator-education space.

*App Stability is unverifiable from external audit. Score is conditional on native mobile builds existing.

OVERALL VERDICT — DO NOT LAUNCH YET

At least six separate issues would cause automatic rejection on first Apple submission. Google Play submission would also fail at the Data Safety Form stage. Launching with these issues wastes the \$99 Apple developer fee, risks account flags on both platforms, and exposes the company to FTC scrutiny for COPPA/FERPA claims made publicly without a corresponding privacy policy.

Section 5 — Top 10 Critical Fixes (Priority Order)

Rank 1 — Will Cause Rejection

1. Write and publish Privacy Policies for all 4 domains (IMMEDIATE)

BLOCKING

- Must be COPPA-compliant — K-12 users are the stated target audience.
- Must disclose: data collected, AI data sharing, third-party SDKs, data retention periods, and contact info.
- Must be accessible inside both apps from a visible Settings screen link.
- Required for: Apple submission, Google Data Safety Form, COPPA compliance, and grant applications.
- Risk without it: FTC can fine up to \$51,744 per COPPA violation, per child.

2. Implement in-app account deletion (IMMEDIATE)

BLOCKING

- Required by Apple since June 2022 and Google Play since May 2024.
- Must initiate from inside the app. Must explain the effect on active subscriptions.
- Add a web-based deletion form as well — this is a Google Play requirement.

3. Fix Founders Pass / Marketplace to use Apple IAP and Google Play Billing

BLOCKING

- Any feature unlocked via payment inside the app must use platform billing.
- Audit every paid feature, subscription flow, and creator-to-creator transaction before submission.
- External payment links, Stripe, or PayPal inside the app = immediate rejection.

4. Build native mobile UX — eliminate web-wrapper risk for FX Studio

BLOCKING

- If FX Studio on mobile is loading pscomixx.online in a WebView, rebuild as a native app.
- Apple rejects web-wrapper apps under Guideline 4.2 with no appeal path.
- Canva, Adobe Express, and comparable tools all ship native SDK-based mobile builds.

5. Implement AI-transparency consent modal

BLOCKING

- Disclose which AI providers are used (OpenAI, Stability AI, etc.).
- Obtain explicit user consent before any personal data is passed to an AI service.
- Required by Apple Guideline 5.1.2(i) since Nov 13, 2025.
- For K-12 users, parental consent may be required under COPPA.

Rank 2 — Will Hurt User Retention

6. Build full UGC moderation system for CoMiXX

RETENTION

- Content reporting on every published item.
- User blocking functionality.
- EULA accepted at sign-up.
- Moderation queue — manual is acceptable at launch; automated later.
- 24-hour response commitment to reported content.
- Without this: Apple rejects, and the K-12 community becomes an overnight liability.

7. Implement age verification at CoMiXX signup

RETENTION

- Under-13 users require parental consent under COPPA.
- K-12 targeting means many users WILL be under 13.
- Must gate AI features and marketplace for under-age accounts.
- School deployment via LMS requires FERPA-compliant data handling — document this explicitly.

8. Replace Gmail contact with @madmixedmedia.com business email

RETENTION

- Required for Apple enrollment verification call.
- Required for professional credibility with schools and partners (Reallusion, Wacom, Epic Games).
- mojocreative1@gmail.com on a corporate site damages trust with every reviewer, grant officer, and enterprise buyer who sees it.

Rank 3 — Polish / Strategic

9. Complete the Age Rating Questionnaire in App Store Connect

POLISH

- Deadline was Jan 31, 2026 — already past.
- Submit the updated questionnaire immediately to avoid submission delays.
- K-12 plus UGC plus AI plus marketplace will likely land at 13+ with content restrictions.

10. Add company name, address, legal entity, and contact info to madmixedmedia.com publicly

POLISH

- Apple requires this to be visible on the domain during enrollment verification call.
- Improves trust for school districts, grant reviewers, and enterprise partners.
- Add a proper /about page and /contact page before enrollment begins.

Section 6 — Strategic Structure Validation

Current Structure

MAD MIXED MEDIA LLC (for-profit) — developer accounts, monetization, IP exploitation.
Press Start Gaming Inc. (501(c)(3)) — curriculum IP, education programs, grant recipient.

Assessment: Structurally Sound, But Requires Tighter Execution

- ✓ **PASS** This dual-entity structure is used by established organizations (e.g., Khan Academy / Khan Academy Labs) and is legally valid.
- ✓ **PASS** Nonprofit-to-for-profit pipeline is smart: Press Start generates credibility and distributes into schools; MADMIXEDMEDIA monetizes the talent and tools.
- ✓ **PASS** Press Start holding curriculum IP makes sense — IP in a nonprofit can receive grant funding without triggering UBIT for the for-profit.

Legal / Financial Risks to Address

RISK 1 — Inurement / Private Benefit

If MADMIXEDMEDIA (LLC) is owned by the same person(s) who control Press Start Gaming Inc., and Press Start contracts with MADMIXEDMEDIA for services, the IRS may determine this is self-dealing or private benefit — a violation of 501(c)(3) status. All contracts between the two entities must be at fair market value, documented, and approved by the Press Start board. The board must include independent directors who vote on related-party transactions.

RISK 2 — Unrelated Business Income Tax (UBIT)

If Press Start earns revenue from marketplace commissions, software licensing, or Founders Pass sales funneled through its ecosystem, the IRS may classify this as UBIT. Education-related revenue is exempt; commercial software revenue is not. Clearly document which revenue stream belongs to which entity.

RISK 3 — COPPA Liability Assignment

Both entities appear in the product ecosystem. If a COPPA violation occurs — e.g., collecting data from a child without parental consent — the FTC will look at who controls the data. Assign data-controller responsibility explicitly. MADMIXEDMEDIA (the LLC operating the app) should own this. Press Start should have a separate school Data Processing Agreement (DPA) for any district deploying via LMS.

RISK 4 — Grant Eligibility Confusion

Grants require a clear applicant entity. Using "Press Start CoMiXX" (the product) as an applicant creates confusion. Grant applications must be filed under Press Start Gaming Inc. with its EIN and — once obtained — its DUNS. Mixing the two entities in grant materials risks disqualification.

Is There a Better Structure?

The LLC + 501(c)(3) structure is appropriate. No restructuring is recommended. What is needed: a formal Intercompany Agreement governing IP licensing, service fees, and revenue sharing at fair-market rates, plus a fiscal-sponsor arrangement for pre-operational grants.

Fix Priority Matrix

A consolidated view of every fix recommended in this audit, ranked by the cost of inaction and the effort required. Use this as the working backlog for the next sprint. The "Blocker" column indicates which platform or body will punish inaction first.

#	Fix	Severity	Effort	Blocker	Deadline
1	Publish COPPA-compliant privacy policies on all 4 domains + in-app	HIGH	Medium	Apple / Google / FTC	Pre-submit
2	In-app account deletion + web deletion form	HIGH	Medium	Apple / Google	Pre-submit
3	Route Founders Pass + marketplace through IAP / Play Billing	HIGH	High	Apple / Google	Pre-submit
4	Rebuild FX Studio mobile as native (no WebView wrapper)	HIGH	High	Apple Guideline 4.2	Pre-submit
5	AI-transparency consent modal + provider disclosure	HIGH	Low	Apple 5.1.2(i)	Pre-submit
6	Full UGC moderation system for CoMiXX (report/block/EULA/queue)	MED	High	Apple 1.2	Pre-submit
7	Age verification at CoMiXX signup + under-13 feature gating	MED	Medium	COPPA / Apple 1.2.1	Pre-submit
8	Replace Gmail contact with @madmixedmedia.com email	MED	Low	Apple enrollment	This week
9	Complete App Store Connect Age Rating Questionnaire	LOW	Low	Apple	Overdue (Jan 31, 2026)
10	Publish legal entity name, address, /about, /contact on madmixedmedia.com	LOW	Low	Apple enrollment	This week
11	Verify D&B legal entity name = "MAD MIXED MEDIA LLC" exact match	HIGH	Low	Apple enrollment	This week
12	Apply for Press Start Gaming Inc. DUNS + SAM.gov registration	MED	Low	Grant eligibility	30 days
13	Intercompany Agreement (IP licensing, service fees, revenue share)	HIGH	Medium	IRS / 501(c)(3)	60 days
14	Assign COPPA data-controller to MADMIXEDMEDIA; draft DPA for school deployments	HIGH	Medium	FTC / FERPA	Pre-submit
15	Confirm "PS Streaming: Coming Soon" is removed or functional at submission	MED	Low	Apple 2.1	Pre-submit

Closing Note

The MADMIXEDMEDIA / Press Start ecosystem has a real product vision, a defensible entity structure, and a clear underserved market in K-12 creator education. The gap to a credible App Store launch is not strategic — it is compliance and execution, and every item above is solvable in weeks. Clear the blocking fixes (items 1–5, 11, 13, 14), ship native builds, resubmit.
